Professional Summary

UI/UX Designer with 11 months of internship experience designing user-centered web and mobile interfaces using Figma. Experienced in wireframing, interaction design, information architecture, visual design, and design systems, with hands-on frontend development experience translating designs into responsive, functional interfaces.

Experience

UI/UX and Frontend Developer Intern July 2024 – December 2024

TamrielAGI *Intern*

- Designed end-to-end UI/UX flows, wireframes, and high-fidelity screens in Figma for responsive web applications.
- Translated design concepts into functional frontend components using React and JavaScript.
- Improved usability and visual consistency by creating reusable UI components and layout standards.
- Collaborated with developers and stakeholders to iterate on designs and deliver production-ready interfaces.

UIUX Designer Intern Sep. 2023 – Feb. 2024

Critter Graphix *Intern*

- Designed UI/UX solutions for an e-commerce website, real estate platform, and tailoring application.
- Created wireframes, interface designs, and visual assets tailored to client and industry-specific requirements.
- Delivered user-centered designs focused on usability, clarity, and visual consistency.

Projects

DevJuice – Developer Tools Discovery Platform (Open Source) | *Figma, React* March 2025 – May 2025

- Designed end-to-end UI/UX for an open-source platform enabling discovery, submission, and management of developer tools.
- Built a consistent design system, responsive layouts, and developer-focused visual patterns using Figma.
- Collaborated design and development by translating UI designs into a production-ready React interface.
- Shipped a live, fully functional product demonstrating design-to-deployment ownership.

Bean Odyssey – Brand Identity and Package Design | *Figma, Photoshop* Sep 2024 – Oct 2024

- Developed a complete brand identity including logo suite, color palette, typography, and packaging concepts.
- Designed shelf-ready packaging visuals aligned with brand storytelling and target customer persona.
- Created cohesive visual assets ensuring consistency across digital and physical touchpoints.

PeakPulse – Fitness App UI/UX Case Study | *Figma, Photoshop* Jun 2024 – Jul 2024

- Conducted user research, persona creation, and user-journey mapping to identify core fitness app user needs.
- Designed high-fidelity mobile app screens focused on usability, engagement, and clarity.
- Defined a brand identity system including logo, color palette, and typography guidelines.

Rapp – Music Wiki Mobile App (UI/UX Case Study) | *Figma* May 2024 – May 2024

- Designed a mobile app concept featuring artist profiles, news, and trivia content.
- Created high-fidelity UI screens emphasizing content hierarchy and visual engagement.
- Established a style guide to maintain visual consistency across app screens.

Education

Velammal Engineering College Chennai, Tamil Nadu

Bachelor of Engineering - Computer Science Engineering; CGPA: 7.93 *Nov 2022 – May 2026*

Skills

UX Design: User Research, Information Architecture, User Journeys, Personas, Wireframing, Interaction Design, Usability Testing, Accessibility, Heuristic Evaluation, Empathy Mapping, Moodboard Creation.
